MAIN STREET GOLIAD | GREETINGS FROM GOLIAD

CHRISTMAS CARD DISPLAY

Quick tips, building ideas & friendly reminders

OPEN TO EVERYONE! No 12-card limit - registration is still required.

PICK YOUR CARD STYLE

- **Folded card**
  Approximately 4 ft tall x 6 ft wide when opened. Join panels with durable outdoor hinges so your card opens like a giant greeting card.
- **Freestanding postcard**
  Choose landscape (4 ft tall x 6 ft wide) or portrait (6 ft tall x 4 ft wide). Add a sturdy wooden brace or weighted freestanding base.

BUILD IT TO LAST OUTDOORS

- **Good materials**
  Exterior-grade plywood, outdoor-rated paint, sealed edges, exterior screws and weather-resistant decorations work well. Avoid ordinary indoor foam board.
- **Make it stable**
  Add triangular braces, a strong back support or suitable weighted base; secure all panels and loose decorations against wind. Keep sharp edges and fasteners covered.
- **Keep it bright**
  Main Street Goliad will provide solar-powered lighting for cards. You may add your own battery/solar lights; there are no electrical hookups.

MAKE IT PERSONAL & PLAN AHEAD

- **Creative ideas**
  Try a hometown Christmas, Texas holiday scene, hand-painted greeting, family tradition or a card celebrating your organization.
- **Handmade artwork only**
  AI can help brainstorm a concept, but the finished artwork must be made by people - no AI-generated finished artwork.
- **Your responsibilities**
  Provide and pay for all materials; build, install, check on and remove your display. Main Street assigns placement and is not responsible for loss or damage.

TIP: Sketch your design first, test your support at home, and weather-seal every side!
